

CUSTOMER CASE

Mediahuis – Managed Services

Customer Fiche

INDUSTRY	Media
EMPLOYEES	1000
ANNUAL REVENUE	€403 Million
LOCATION	Antwerp – Hasselt – Groot-Bijgaarden, Belgium

Challenges

Mediahuis uses Oracle as the underlying database for a number of important applications. In the past, one DBA managed everything. But due to the changing availability expectations, it was no longer possible to let one person handle the support required.

Solutions

The Oracle databases are continuously monitored by Exitas so that action can be taken proactively and when necessary. Exitas is the partner who advises about upgrades, licensing and optimizations. They also provide the support outside business hours and during holiday periods when the DBA is absent.

Why Exitas?

"Exitas is one of the most experienced Oracle partners in Belgium, and was able to deliver Mediahuis a customized offer. They have a wide range of people with in-depth Oracle knowledge on which Mediahuis can rely. Exitas can also respond flexibly to requirements for Oracle knowledge needed in projects."
